If you are lucky

What helps the most?

If your GPA is low, or you don't have publication, or you don't have IELTS, or you did your masters by course work only [no research] then these factors reduce your chances of selection but doesn't disqualify you from the scholarship, you can still apply and I know many people who got excellent scholarships despite all these disadvantages due to their hard work and continuous improvement PhD scholarships are available for all fields.

Motivational Letter

The phone screen displays a webpage with a blue header "HOW TO WRITE A STATEMENT". Below the header is a section titled "WHY IS IT IMPORTANT?". The text explains that a statement of purpose is important because it defines who you are in both academic and personal uniqueness. It is the only document universities have to observe your style of writing and personal qualities.

Sample essay questions from various universities are provided:

- Texas A&M University:** "Please provide a statement describing your field of interest and the objectives of your educational program and professional career. This may include specific programs within your chosen major/field of study."
- University of Utah:** "Applicants must submit a brief (maximum two pages) personal statement describing his/her educational background, special interests, and reasons for wanting to enter into graduate studies in the geosciences at the University of Utah. If the applicant has previously communicated or interacted with particular faculty members in this department and/or has contemplated the possibility of working with a particular professor on a graduate research project, that information should be included in the personal statement."
- George Mason University:** "In 750 to 1,000 words, state your professional plans and career objectives (Goal Statement). Please include your personal qualities and development and how they have influenced your career choice; your reasons for this particular degree in relation to your academic background, professional work experience, and career goals; and your reason for selecting your program."

The statement of purpose is probably one of the most important parts of your application because it defines who you are in both academic and personal uniqueness. It is the only document they have to observe your style of writing and personal qualities. Many universities are looking for a good fit for their program. By reading a student's statement of purpose, they can determine if the student's interest and qualifications match what the program needs. Below are a few sample essay questions from various universities' websites. While the wording may vary between each university, most of them say and require the same information.

"Please provide a statement describing your field of interest and the objectives of your educational program and professional career. This may include specific programs within your chosen major/field of study."

- *Texas A&M University*

"Applicants must submit a brief (maximum two pages) personal statement describing his/her educational background, special interests, and reasons for wanting to enter into graduate studies in the geosciences at the University of Utah. If the applicant has previously communicated or interacted with particular faculty members in this department and/or has contemplated the possibility of working with a particular professor on a graduate research project, that information should be included in the personal statement."

- *University of Utah*

What universities says about it?

- 1. Opening paragraph – good, solid paragraph outlining your overall interest in the graduate program at the university.**

- 2. What are your professional goals following graduation and why you feel that a Master's/PhD will help you attain those goals?**
 - A. Goal #1 (1 sentence)**
 - a. Reason #1 why a master's will help you reach Goal #1 (1-2 sentences)
 - b. Reason #2 why a master's will help you reach Goal #1 (1-2 sentences)

 - B. Goal #2 (1 sentence)**
 - a. Reason #1 why a master's will help you reach Goal #2 (1-2 sentences)
 - b. Reason #2 why a master's will help you reach Goal #2 (1-2 sentences)

 - C. Goal #3 (1 sentence)**
 - a. Reason #1 why a master's will help you reach Goal #3 (1-2 sentences)
 - b. Reason #2 why a master's will help you reach Goal #3 (1-2 sentences)

(If you have 3 goals, it would be appropriate to have only 1 reason for each goal, but they need to be very solid reasons.)

Sample

3. What specialty areas will you probably be preparing yourself for?

- A. Specialty area 1; 1 reason why (2 sentences total)
- B. Specialty area 2; 1 reason why (2 sentences total)

4. Why do you think that (Name of University) can offer you what you need in a Master's/PhD program?

- A. This is where they want you to tell them why you picked them out of all the other country's program to apply to—what makes them unique?
 - a. Is there a specialty they offer that coincides with your path of interest?
 - b. Is it the location that provides unique opportunity for study?
 - c. Do their professors have a reputation that you like/prefer? i.e. work closely with students, etc?
